2022-2024 (current)

### Software Development Alfa-college

I'm currently in college studying front-end development. My goal is to work in a team where everyone is focused on improving user experiences and creating websites that people enjoy using. I want to be part of a fun, collaborative environment where I can share ideas and learn from others while actively contributing to meaningful projects. Building and improving websites alongside coworkers who share the same passion for making things better for users is something I'm really excited about.

2021 - 2023

### Albert Heijn Stock Clerk

As a stock clerk, my job is to complete tasks according to the schedule within my shift. Working at Albert Heijn Rijksweg 129A is different from other supermarkets. It's a place where you can be yourself, share jokes, and enjoy a relaxed atmosphere. It's a very fun place to work.

2018 - 2019

### Santibri newspaper delivery

As a Santibri delivery person, my responsibility was to deliver brochures and newspapers to residents within the assigned time. Working for Santibri was quite challenging. Twice a week, I delivered to about 100 households: newspapers on Wednesdays and folded brochures on Saturdays. At 13 years old, this was my first job, and I was very enthusiastic. I met many people and learned a lot about time management and routine.
